Right Now why you said machine profit hold not good. The most of import thing is no much people go to the machine play. The total accept coin is too less. This machine program at first will lose some money to the player as promotion attract people playing.when playing people a lots of and collect the total coin in amount. But everytime you change the parameter,will change the profit hold(we have make the difficulty code for you).

So right now you want the profit hold most hardest.we suggest you after get the times up code ,let the machine work again.

And go to the background system setting.

Finde the “Code setting” and press” 确定 -CONFIRM” .

And we help you calculate the most hardest code to you.you input and save the data.and exit. Machine profit hold will become most hardest.
